WESTERN METAL SUPPLY CO. INC.

DESIGN/BUILD SYSTEMS WORLDWIDE

SBA 8(a) Certified Firm

Western Metal Supply Company Inc. designs and provides a broad range of commercial building systems. Construction specialties include building systems for warehousing, equipment shelters, training facilities, aircraft shelters and maintenance shop facilities. Building Systems can be custom designed and constructed in different facades such as insulated aggregate panels, brick and stucco.

Western Metal offers comprehensive building systems packages that include design and architectural services, engineering, site preparation and building installation. For any of your upcoming projects in the U.S.; Western Metal has the ability to provide a team of construction experts that bring 30+ years of Federal Government Contracting Experience.

WESTERN METAL SUPPLY COMPANY INC.

PERMANENT HORIZONTAL LIFELINE KITS

Western Metal Supply Permanent Horizontal Lifeline Kits provide automatic pass through fall protection for multiple workers that ultimately increase worker mobility and productivity. Kits provide do it yourself installation and feature patented stainless steel components that are easy-to-use and require minimal maintenance. For use along crane rail runways, loading bays/docks, machinery, conveyors, rooftops, inside sports arenas, bridges and many industrial applications such as aircraft shelters and wash-racks.

- **Easy Installation**
- **Extreme Durability**
- **Low Deflection**
- **Low Cost of Ownership**

EXCLUSIVE FEATURES:

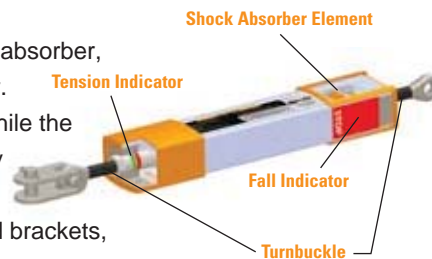

WMS Shuttle-

The WMS Shuttle self-aligns for smooth pass through of intermediate brackets. A double-locking mechanism ensures security, yet allows for easy, one hand operation. With no moving pass-through parts, the shuttle is ideal for dusty, gritty or salty environments.

Stainless Steel D-bolt Anchorage Connectors
(includes hardware)

4-in-1 Shock Absorber-

The innovative 4-in-1 design serves as shock absorber, turnbuckle, tension indicator, and fall indicator. Users can gauge and adjust tension easily, while the pop-out visual indicators alerts the user to any load impact on the system. The compact design allows for a shorter distance to the end brackets, providing greater safety for entry and exit of the system.

Universal Intermediate Brackets-

The automatic pass-through design allows for smooth passage of the WMS Shuttle providing 100% connection to the system. The single-bolt design and easy to remove cable holder guide simplifies installation and maintenance. In the event of a load impact or fall, individual brackets can be replaced without disassembling or replacing the original wire rope. Available in adjustable or fixed position styles for maximum versatility.

BETTER SYSTEM BY DESIGN

In addition to meeting all applicable global standards for Safety Height, all components of WMS kits are design for versatility, reliability and comfort.

- *Stainless Steel 5/16-in. (8mm) wire rope.
- *Stainless Steel, swageless, fittings for quick easy installation.
- * Stainless steel D-Bolt anchorage connectors rated to 10,000 lbs.
